DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I and Species A in the reply filed on July 26, 2004 is acknowledged.
2. Claims 33-50 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention and species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on July 26, 2004.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Art Unit: 3752

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 26-30 are rejected under 35 U.S.C. 102(b) as being anticipated by Stegmaier et al. (5,383,606).

Stegmaier discloses a fuel injector comprising: an actuator 5; a valve closing body 53; a valve needle 47; a restoring spring 39; a sleeve 41; an adjusting body 81; an adjusting tool 99. The term "mounted" is defined as:

1. To climb or ascend: mount stairs.
2. To place oneself upon; get up on: mount a horse; mount a platform.
3. To climb onto (a female) for copulation. Used of male animals.
4. a. To furnish with a horse for riding. b. To set on a horse: mount the saddle.
5. To set in a raised position: mount a bed on blocks.
6. a. To fix securely to a support: mount an engine in a car. b. To place or fix on or in the appropriate support or setting for display or study: mount stamps in an album; mount a specimen on a slide.
7. To provide with scenery, costumes, and other equipment necessary for production: mount a play.
8. To organize and equip: mount an army.
9. To prepare and set in motion: mount an attack.
10. a. To set in position for use: mount guns. b. To carry as equipment: The warship mounted ten guns.
11. To post (a guard).

Claim Rejections - 35 USC § 103

Art Unit: 3752

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 31 is rejected under 35 U.S.C. 103(a) as being unpatentable over Stegmaier et al. (5,383,606) in view of Muller et al. (WO99/10649).

See US Patent 6,145,761 for English translation of WO99/10649.

Stegmaier discloses the limitations of the claimed invention with the exception of the aperture plate. Muller discloses an aperture plate 39. It would have been obvious to a person having ordinary skill in the art at the time of the invention to have incorporated the aperture plate of Muller to the device of Stegmaier to center the spring.

Allowable Subject Matter

7. Claim 32 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
